I request that these comments be made a part of the official record.

I have grave concerns regarding the PFS company's proposal to store "spent" fuel rods on the Skull Valley Goshute/Shoshone Indian Reservation.

Skull Valley is frequently part of the U.S. military's war game flight plan. Planes, helicopters and bombers frequently use the valley as target practice. While the military strives for minimum accidents or errors, they have had accidents. They cannot guarantee safety. Thus, the nuclear rods are an accident - a horrific accident - waiting to happen.

Skull Valley residents are a quiet, non-complaining people, and have endured many accidents and injuries at the hands of others. We cannot afford this plan - narrow and inhumane in focus - to leave yet another sorrow on the people.

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.
